- 5. Proposed Projects and Planning for the Coming Year**
- 6. Appendix 1 – Site Condition Reports**
- 7. Appendix 2 – Site Visitor Logbooks**

1. Management of Operations

a) Maintenance & Projects

The six Sea to Sky Marine Trail sites in Howe Sound are Recreation Sites established by the British Columbia Marine Trails Network Association (BCMTNA), Trans Canada Trail and RSTBC in 2015. In the spring of 2017 the Sea Kayak Association of British Columbia (SKABC), a Vancouver based sea kayak club, entered into a partnership agreement with RSTBC to look after maintenance of the six sites.

In 2018 the following maintenance and projects were performed:

- 1) **Tantalus Landing Table** – On April 14 & 15, 2018, a volunteer team built a large custom table on an existing concrete base at Tantalus Landing. A coat of linseed oil was subsequently applied. Rounds from a bucked-up hazard tree have been used for seating.

Tantalus Landing table

- 2) **Spring Site Inspections** – Site inspections were carried out by powerboat at all six sites May 12 & 13, 2018. Minor work was done on the sites.
- 3) **Visitor Logbooks** – Waterproof logbooks were installed in plastic cases at all sites during the May 12 & 13 site visits. There is also an online logbook that can be accessed through the SKABC website, although it does not appear to be getting much use compared to the logbooks at the sites. One plastic case was broken over the course of the season and required replacement, and two pens had to be replaced. One logbook (at a site used by camp children) was subject to graffiti.

Visitor logbook in waterproof case

- 4) **Danger Trees** – Two SKABC volunteers went to all sites May 9 with a danger tree assessor and Jeff Levine of Sea to Sky Adventure Company. Powerboat transportation provided by Sea to Sky Adventure Company. Only a few danger trees at most sites, but a large number at Zorro Bay. Falling was then carried out by BC Wildfire Service. Two fallers and a cleanup crew member at the sites for three days.
- 5) **Picnic Tables** - Five picnic tables were built by SKABC volunteers using recycled cedar decking, and painted the official dark brown RSTBC colour. Three SKABC volunteers delivered them to the sites August 6.

Picnic Table at Thornbrough Channel

- 6) **Fall Site Inspections** – On the weekend of October 13/14, 2018, site inspections were carried out by powerboat at all six sites. Minor work was done on the sites.
- 7) **Tantalus Landing Bridge** – On October 17 & 18, four SKABC Volunteers completed most of the work for a two-log bridge over the creek at Tantalus Landing. Decking of the bridge remains to be done, as well as steps up the bridge at the south end.

Bridge logs and wire handrail in place

- 8) **Zorro Bay Toilet** – Installation of a urine-diverting composting toilet has been delayed and is now scheduled for early in 2019.
- 9) **Video/Presentations** – A video on the Howe Sound sites was presented at the BC Marine Trails Spring Forum April 7, 2018, followed by an expanded presentation at the May 7, 2018 SKABC meeting. The video is now online at the SKABC website and can be accessed via the following link:
<https://youtu.be/NkZVKMMJXvw>

See the Appendix for year-end site condition reports.

b) Volunteers

26 volunteers from SKABC visited the sites for the maintenance and projects noted above.

c) Incidents and Actions

- 1) All six site are boat access only and are not patrolled on a regular basis.
- 2) In early 2018, it was noted that the Squamish language panel of the Ramillies Channel site sign had been broken off (vandalism presumed)

and was on the ground beside the sign. A SKABC volunteer retrieved the panel by kayak and delivered it to the RSTBC office. RSTBC had the panel repaired and it was reinstalled by SKABC volunteers during the May site inspections.

- 3) One logbook plastic case and pen were broken at Islet View which may have been vandalism, although the logbook was intact. The logbook case was replaced during the Aug. 6, 2018 picnic table delivery and there has been no damage noted since.
- 4) The site visitor logbook at Thornbrough Channel was subject to graffiti. It is noted that this site is used by Camp Potlatch and it is likely that the graffiti was done by a youngster. Several pages were marked up but the logbook remains usable.
- 5) No other incidents or actions were reported.

d) **Management Concerns**

Following are the most significant current management concerns:

- 1) None of the six sites currently have latrine facilities (a urine-diverting composting toilet is in progress for Zorro Bay). Users are expected to use Leave No Trace practices:
 - i. Go below tide line, cover with rocks or sand, or
 - ii. Dig a small hole well away from streams, cover with soil.
 - iii. Pack out toilet paper.Unburied human waste and toilet paper were found at two sites. Additional signage has been posted in the food cache boxes. In the longer term, outhouses should be provided at all sites, starting with the most heavily used sites.
- 2) Two sites, Thornbrough Channel and Tantalus Landing, require bridges at creek crossings. Most of the work for a two-log bridge over the creek at Tantalus Landing has been completed in 2018. Decking of the bridge remains to be done, as well as steps up to the bridge at the south end. No work has been done yet on the bridge at Thornbrough Channel.

e) **Enforcement Support**

No enforcement support is currently required.

2. **Summary of Visitors and Revenue**

a) **Visitors**

Visitor logbooks were installed at all six sites on May 12 & 13, 2018. The following visits were recorded based on onsite and online logbook entries:

- a. **Ramillies Channel** – 11 day visitors. 114 overnight visitors, including 3 groups from Camp Fircom.

- b. Bain Creek** – 8 day visitors. 139 overnight visitors, including 7 groups from Camp Potlatch.
- c. Thornbrough** – 43 day visitors, including 1 group from Camp Potlatch. 67 overnight visitors, including 3 groups from Camp Potlatch.
- d. Islet View** – 41 day visitors, including 1 group from Camp Potlatch. 86 overnight visitors, including 3 groups from Camp Potlatch.
- e. Zorro Bay** – 75 day visitors. 38 overnight visitors.
- f. Tantalus Landing** – 41 day visitors. 18 overnight visitors.

Total for all sites: 219 day visitors, 462 overnight visitors. It is known from anecdotal evidence that some day and overnight visits were not entered in the logbooks, so actual site usage is higher.

Four sites, Ramillies Channel, Bain Creek, Thornbrough Channel, Islet View and saw visits by large parties from Camp Fircom and Camp Potlatch.

Zorro Bay saw significant day use by powerboat, and it is likely that there were more visits that were not recorded. At other sites, the majority of visits were by self-propelled watercraft (kayak, canoe and stand-up paddleboard).

b) Revenue

All six site are boat access only and no fees are charged for use.

\$5000 per year is provided to SKABC from RSTBC for maintenance and projects on the six sites. The 2018 revenue has been allocated to the Zorro Bay composting urine diverting toilet.

3. Summary of Expenses

In 2018, expenses were incurred for the following maintenance and projects:

- 1) Zorro Bay Toilet – Composting urine diverting toilet. In progress.
- b) Spring site condition reports
 - 1) Powerboat and camping
- c) Picnic tables
 - 1) Powerboat and materials (wood was salvaged at no cost).
- d) Fall site condition reports
 - 1) Powerboat and camping
- e) Bridge construction at Tantalus Landing
 - 1) Powerboat and materials (logs and decking were salvaged at no cost).

SKABC will invoice separately for the above expenses.

4. Year End Condition of Infrastructure

- a) Generally, all sites are in good shape and show evidence of moderate use.
- b) Bathroom etiquette signs are present at all sites.
- c) Food cache boxes, new in 2017, are in good shape. Some minor garbage was found in some boxes.
- d) Unburied human waste and toilet paper were found at two sites, with some evidence of creek areas being used as toilets.
- e) One danger tree was left in place at Ramillies Channel due to wildlife values.
- f) Garbage, from a garbage pit exposed at Ramillies Channel when a hazard tree was felled, has been bagged and requires removal by powerboat.

Please see Appendix 1 for individual Year-End Site Condition Reports.

5. Proposed Projects and Planning for the Coming Year

- a) It is anticipated that the urine-diverting composting toilet at Zorro Bay will be completed in early 2019. Based on the Zorro Bay experience, discussions will be held with RSTBC regarding toilets for the remaining Howe Sound sites.
- b) On the following pages is a table outlining possible 2019 projects for the Howe Sound sites. Projects will be prioritized over the winter and will proceed as volunteers and resources become available.

Plans for 2019

Site	Task	Tools Materials	Comment
Tantalus	Finish bridge – decking,, non-skid, wire for turnbuckles, approach steps, securing guy wires	Carpentry, masonry	Schedule – most likely will need boat transport for materials
Zorro	Assist contractor to complete toilet, familiarize with toilet maintenance, operation. Plan maintenance schedule, take down poop sign, improve access trail if needed		
Ramillies	Pick up bagged garbage, excavate, clear garbage pit, remove all.		Need boat transport
Thornbrough	Build bridge over stream	Chain saw, bush saw, peavey, pro gear, fuel, rock gear, lever hoist, chains	Need boat transport
Tantalus, Islet Vw, Bain	Repair, improve boat runs	Rock bars, lever hoist, chains, cables, anchor straps etc shovels	Need boat transport. Select low tide day, except for upper part of Tantalus
Tantalus	Check hanging rock flakes for security	Climbing gear, helmet, harness, radios, crow bar	Help from climbers?
Bain et al	Buck any logs fallen by BC Wildfire crew in Spring	Chain saw, bush saw, peavey, pro gear, fuel,	Need boat transport
Thornbrough	Trail work at upper section, steps/water bars, steps for food bin access	Mattock, pick, flagging tape, saws, loppers, shovel, hammer, trowel etc	Need boat transport
Thornbrough	Cut deadfall– throw logs into bush.	Chain saw, bush saw, peavey, pro gear, fuel	Need boat transport
Zorro	Clear piled brush from campsite (fire hazard noted)	pile, drag on tarp, gloves, rake?	beach burning pile? Best done in winter. Any transport mode.
Tantalus?	Plan identify location, organize next toilet installation – Tantalus? Contractor?		Any transport mode.
Islet Vw	Add trail fill – level, build tent platform above current site if no conflict with planned toilet location	need shovel, bucket, rake, may more	Need boat transport
Bain, Zorro, maybe Tantalus	Add water drainage bars across hills on trails	rebar, lumber, chainsaw to use local wood, sledgehammer, hacksaw, file, pick, trowel	Need boat transport
Zorro	Build prototype tent platform		Need boat transport

SKABC**Year Plan for Howe Sd Sites****2019**

	on slope without excavation		
Thornbrough	Build prototype tent platform on bluff		Need boat transport
Bain, Ramillies, Zorro, Tantalus	Level more sites	need mattock, shovel, bucket, rake	Need boat transport
Islet Vw	Trail work - steps, stairs to expand site	Mattock, pick, ties, nails, rebar, sledgehammer	Need boat transport
Ramillies	Fix steps – concrete blocks	rebar, lumber, saw , hammer, hacksaw, file, pick, trowel, bucket to collect pebble	
Zorro	Find, mark, flag water source, decide if worth 'buying in' with locals, tapping into line and running pipe to site for campers.		Any transport mode
All	Spring inspection, minor maintenance		Dates required. Transport method?
All	Fall inspection, minor maintenance		Dates required. Transport method?

6. Appendix 1 – Site Condition Reports

Ramillies Channel Site Inspection Sheet

SKABC		Howe Sd Site Inspection Oct 13		Fall 2018
Site Name: RAMILLIES CHANNEL		Your comment/ observation. Was action taken?		
Landing: Access from beach safe, secure? Clear of obstructions? Beach debris- flotsam, plastics,?		access safe many logs No flotsam or plastic		
Log Book: Intact, dry, enough space, pen ok?		Image of each page - send to Steve Best s2smarinetrail@skabc.org		
Visitors - today #Campers? #Day Visitors? Where from? How did they come (e. g SUP, water taxi, kayak)		None		
Tent Sites How many? Condition? Level and smooth? Any hazards (trees)? Litter or debris? Trimming needed? Sketch map helpful to identify sites		8 good level No No		
Trails Any hazards (trees)? Safety? Erosion or water issues? Access issues? Unnecessary trails?		be careful - uneven terrain! (terrain)		
Signs (present and in good condition?) Ocean -side site sign with name Large map sign? Other signs?		List or image All good		
Steel Food bin Functional? Clear of garbage, old food? Signage ok?		good condition clean, signage ok.		
Nasty Waste Visible human waste? Toilet paper? Where? How much?		None Die pit revealed by tree fallers. Nasty cleanup		
User Behaviour Vandalism? Tree cutting? Fire pits in upland? Stream disturbance?		None Took out 2 bags + window left by bin		
Kitchen: Any camp furniture? Old tarps, rope?		1 picnic table		
Overall Estimate how much use is this site getting?		good recent use see log book photo.		
Overall How could we make this site better?		best platforms repair steps at entrance toilet.		
Overall What are the priority issues?		Big cleanup of garbage pit.		
Date of visit		Oct. 13/18		
Reporter name (s) with email address(es)		Rob Leeson		

+ 2 REMOVE 2 FULL BAGS OF GARBAGE, WINDOW FRAME

MAIN ISSUE IS REMOVAL OF GARBAGE FROM OLD PIT/DUMP

Bain Creek Site Inspection Sheet

SKABC		Howe Sd Site Inspection	Fall 2018
Site Name: Bain Creek		Comment/ observation. Action taken.	
Landing Access from beach safe, secure? Clear of obstructions? Beach debris- flotsam, plastics,?		✓ Nowhere to leave boats.	
Log Book Intact, dry, enough space, pen ok?		Image of each page ✓ 2	
Visitors - today #Campers? #Day Visitors? Where from? How did they come (eg SUP, water taxi, kayak)		no	
Tent Sites How many? Condition? Level and smooth? Any hazards (trees)? Litter or debris? Trimming needed? Sketch map helpful to identify sites		/// existing + possible site up nr bluff: needs branch cutting & levelling. Began! + 3 more higher up: — " —	
Trails Any hazards (trees)? Safety? Erosion or water issues? Access issues? Unnecessary trails?		Trail to upper area can be upgraded. Cleared much salal, etc.	
Signs (present and in good condition?) Ocean -side site sign with name Large map sign? Other signs?		List or images ✓	
Steel Food bin Functional? Clear of garbage, old food? Signage ok?		✓ Also a wire hang.	
Nasty Waste Visible human waste? Toilet paper? Where? How much?		B TP 5 TP	
User Behaviour Vandalism? Tree cutting? Fire pits in upland? Stream disturbance?		Fire pit on top of bluff, kicked away.	
Kitchens Any camp furniture? Old tarps, rope?		Picnic table was sloping - we levelled via small holes & blocks of wood.	
Overall Estimate how much use is this site getting?		Fair	
Overall How could we make this site better?		Pit/compost toilet needed. New tent sites.	
Overall What are the priority issues?		Toilet.	
Date of visit		Sun 14 Oct
